Digital Map

How to add the digital map to your phone

My favourite part of this guide is the Digital Map. It makes life so much easier while on the ground in London and it allows you to be flexible – all good stuff when you're on the trip of a lifetime. For you to get the most out of this itinerary, it's vital that I get the Digital Map working for you.

Here's how to add it to your phone:

1. Download the Google Maps app to your phone or tablet, or both. It's available for iOS and Android. If you don't already have a Google Maps account, sign up for one.
2. Access the digital map here, click the button or scan the QR code.

[ACCESS THE DIGITAL MAP](#)

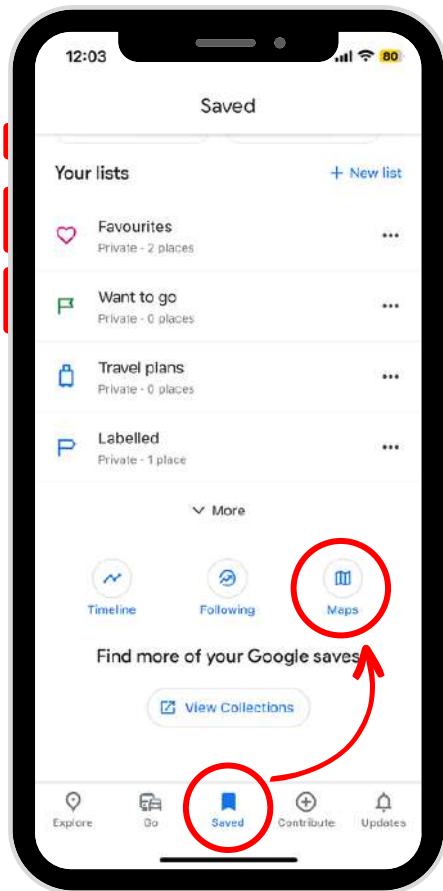

3. Once you've clicked and visited the map once, it will then be automatically saved to your Google Maps app. Just make sure you're logged into the same Google Maps account across your devices. The map also works in any internet browser, in case you want to view it on your laptop.

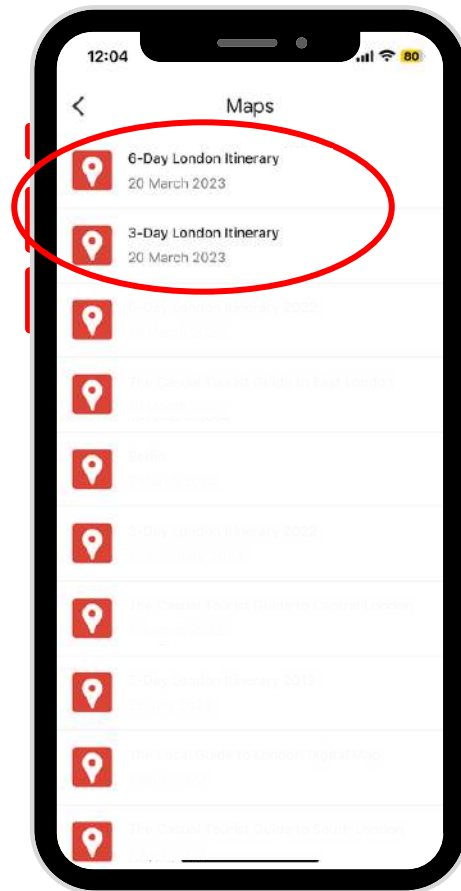

How to find the digital map on the Google maps app

1. Once you've clicked and visited the map the first time, it will then be added to your Google Maps app.
2. Open the Google Maps app, and click on "Saved" in the bottom middle (see screenshots on the next page).
3. Click "Maps" in the menu.
4. You'll see the Digital Map in this list. Click it to view.
5. There you go! Click "View Map Legend" to control which category of pins is shown (this feature is only available on iOS systems and desktop).

Step 2 and 3

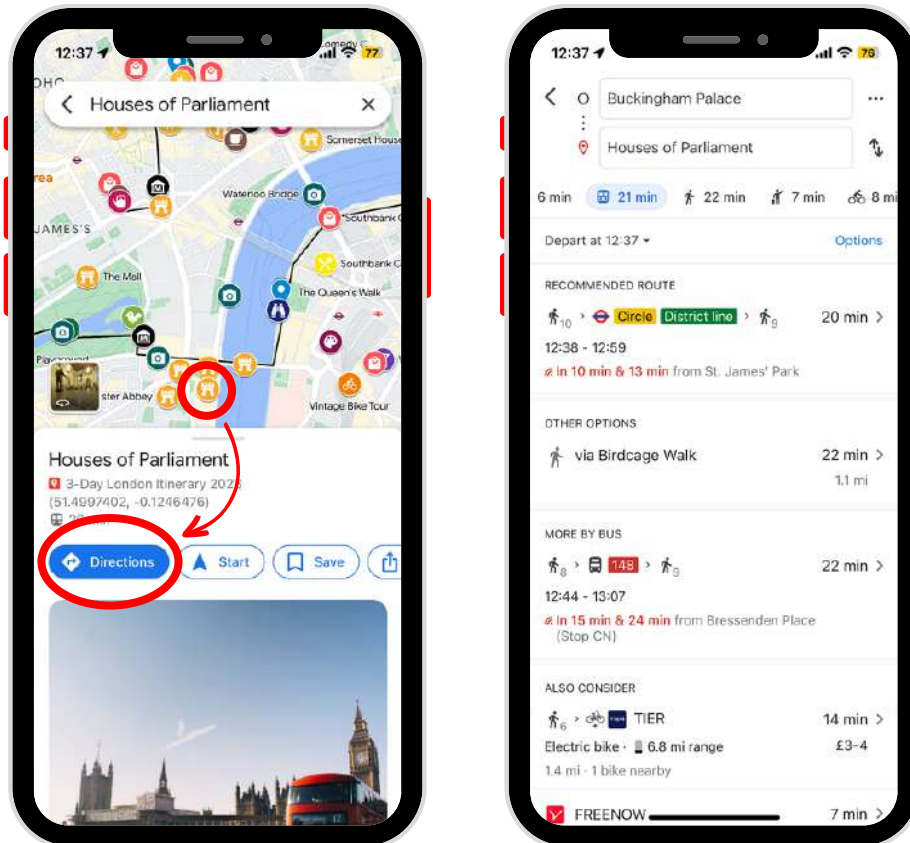

Step 4

Step 5: this feature is only available on iOS devices and desktop

How to get directions to a pin on the map

Know where you want to go next? Just click on its pin, then click “directions” to see all of your transport options, including walking directions.

Check out my **video tutorial**, where you'll find how to access the digital maps, how to use it when you are on the ground in London, and where to find the map on the Google Maps app.

Having trouble seeing the descriptions for map pins?

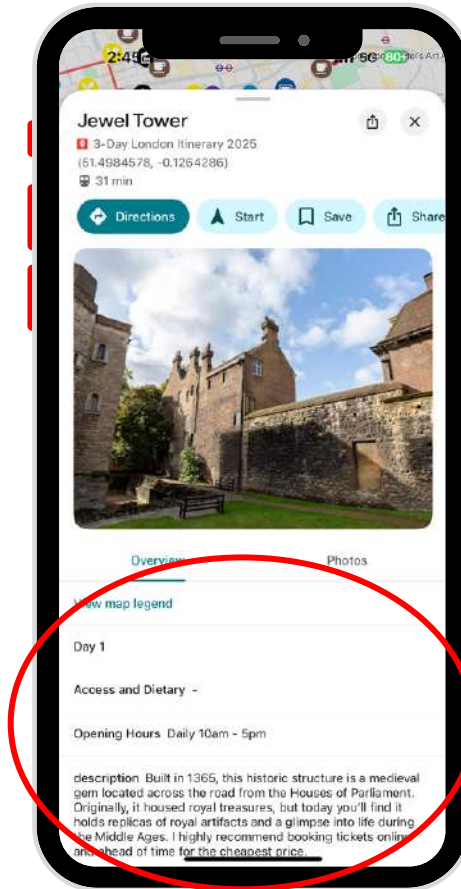

If clicking on multiple pins isn't showing their descriptions, follow these quick steps to fix it:

1. Go to the Itinerary Map and click on the pin you want to view. The first pin you select should show its description without any issues.
2. Before clicking on another pin, be sure to close the current one first. To do this, either click the 'X' on the right side of your screen or tap anywhere else on the map. This resets the view and allows the next pin's description to load correctly.

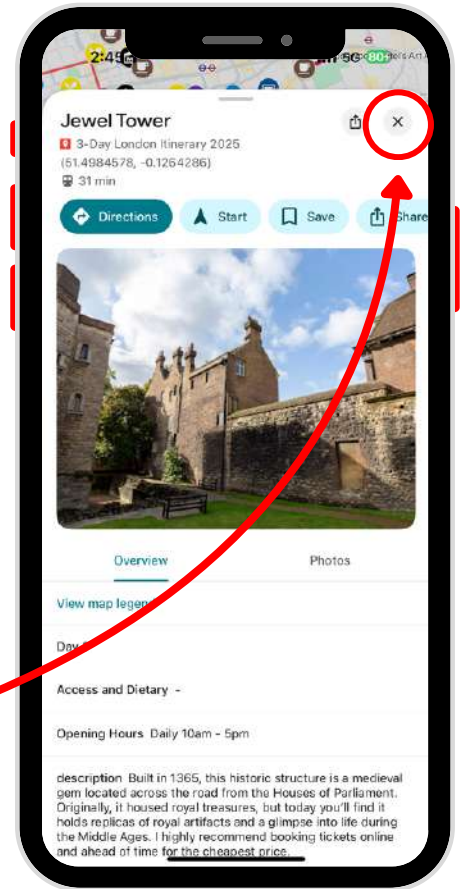

⚠ If you skip this step and click on a new pin without closing the previous one, its description may not appear, as shown below.

To avoid this, do these steps →

Step 1

Step 2

Troubleshooting

If you're struggling to get your map working, here are common solutions:

1. Is your Google Maps app updated to the latest version?
2. Are you logged into the same Google Maps account across your devices? If your map is showing up on one of your devices but not the others, it's usually because you're using different accounts.
3. Can you try accessing your Digital Map on a desktop first, while logged into your Google account?

And finally, if you're still having problems, just email my team and I at hello@loveandlondon.com and we'll be happy to help you out.
